

Sohail Shrestha

Senior Software Engineer

sohailshrestha2@gmail.com | github | linkedin | sohailshrestha.com.np

Core Skills

Frontend: React, Next.js, Vue.js, Redux, Tailwind CSS, Lit.js

Backend: Node.js, Python, FastAPI, Fastify, Nest.js

Data: PostgreSQL, MongoDB, Redis, MySQL, OpenSearch

Cloud / DevOps: AWS, Docker, Kubernetes, Jenkins, GitHub Actions, Vault, Datadog

Practices: Microservices, TDD, CI/CD, Agile/Scrum

Programming Language: Typescript, Javascript, Python

Experience

Senior Software Engineer

Oct 2025 – May 2026

A5 Labs · Contract

Foster City, CA (Remote)

- Drove a monorepo-wide TypeScript initiative across 6+ packages, reducing production type-related bugs by 98%.
- Delivered a zero-maintenance translation solution in 30 minutes, opening China market and saving weeks of cross-team work.
- Built reusable lit components compatible with React and Vue, eliminating duplicate UI work across 3+ codebases.

Senior Software Engineer

Jun 2024 – Sep 2025

G LNK (YC W25) · Contract

New York, NY (Remote)

- Built an MVP in one week with a team of two, enabling the company to secure Y Combinator funding.
- Replaced monolithic API with microservices, eliminating bottlenecks and boosting performance by more than 50%.
- Developed AI-powered search and Kanban board with Redis caching to handle latency, reducing loading times from 10s to 0s and significantly enhancing UX.

Senior Software Engineer

May 2023 – Jun 2024

Mynth · Contract

Wilmington, NC (Remote)

- Delivered launch-ready MVP with a 4-developer team in 1 month, proving feasibility and preserving runway.
- Established CI/CD pipeline using ArgoCD, automating software delivery and enabling seamless deployments.
- Implemented Vault-based secrets management, securing sensitive keys and reducing exposure risk across the team.

Senior Software Engineer

Jul 2021 – Mar 2024

Fusemachines · Full Time

Kathmandu, Nepal (Remote)

- Re-architected search functionality using OpenSearch, reducing query response time from ~10 seconds to milliseconds and materially improving user-facing performance.
- Contributed across the stack on client engagements, mentoring junior engineers and driving adoption of testing and code-review best practices.
- Delivered features across multiple client projects spanning different industries and tech stacks, adapting quickly to new codebases and requirements.

Software Engineer

Jun 2018 – Jun 2021

Tootle · Full Time

Kathmandu, Nepal

- Increased app stability from 60% to more than 90%.
- Reduced Google reverse geocoding billing by more than 50%.
- Collaborated closely with product and operations teams to launch and iterate on features for a rapidly growing user base.

Selected Projects

Quintace: Platform to play and train in Poker.

G LNK: Search for health care providers with AI.

Tootle: Nepal's first ride sharing platform.

Education

Bachelors in Computer Application

2015 – 2018

Sharda University

Delhi NCR, India
